

Realizar un análisis de la AI de un sitio web (biblioteca.ugr.es)

– Organización y estructuración de la información

Organization and structuring of information:

- are usable and the product is useful and fill a need but I think it doesn't easy to use, someone needs a simple experience to use it,
- The information of the website is structured in a hierarchical way

– Sistemas de navegación (globales, locales, contextuales)

– Sistemas de búsqueda

There are two ways to search that make the site better to use and usable

quick search is very cool to use just type what you want the system will do filtering about your words that make this way most used

– Etiquetado

should focus on the most important tasks that users undertake.

So The labels that are displayed on the page, in the "Header" exist for each topic they have Facebook, Twitter and YouTube icons and next to it a text that says "Networks Social".

set of labels for example
