Drag and Drop.
With systemwide drag and drop on iOS, users can quickly and easily move text, images, and files from one app to another. Simply tap and hold to pick up the content and drag it to the other app. Multi-Touch, a way to select multiple items, lets you pick up several items just by tapping. And with spring-loading, you can copy to another app by dragging content over the app's icon in the Dock or on the Home screen.
